Unit Urged to Decide On New Kennedy Study

Washington, Sept. 28—(UPI)—Rep. Theodore R. Kupferman (R-NY) today proposed a congressional committee be created to decide if there should be a new investigation into the assassination of President Kennedy.

Kupferman said he planned to introduce a resolution to that effect in the House because of what he described as a "new wave of criticism" of the Warren Commission and its report on the assassination.

He said recent critics have raised a serious question as to "whether the members of the Warren Commission took the necessary time to examine thoroughly all the available material and evidence . . . or whether they were disposed to satisfy a certain view, being persuaded in the public interest to come to a speedy decision."
